

Microsoft Surface Hub 2S

Fact Sheet
April 2019

Meet Surface Hub 2S, the all-in-one collaboration device that lets you break free from the conference room. Surface Hub 2S is an elegant, portable, interactive device that can move from one space to another without disrupting your team's flow. Bring remote and local employees together on a crisp 4K+ resolution screen with enhanced camera, speakers and microphone technology.¹ Surface Hub 2S has over 50% faster graphics, and 30% better power efficiency than the original Surface Hub.² It's everything you loved about Surface Hub in a thinner, lighter, more versatile package.

Top Features and Benefits

Make any space teamwork space. With Surface Hub 2S, enjoy the freedom to take your ideas with you and turn any space into a teamwork space. Wherever you or your team moves, works or collaborates, Surface Hub 2S easily moves with you thanks to the Roam™ Mobile Stand created by our partners at Steelcase. Surface Hub 2S is slimmer and 40% lighter than the original Surface Hub.² And with the APC™ Charge Mobile Battery,⁴ your team's workflow remains uninterrupted as you unplug and move to a new space.

Bring remote teams together. Whether a team is in the same room or spread across the globe, Surface Hub 2S is a powerful platform for Microsoft Teams and Skype for Business meetings that lets remote employees actively participate in meetings or working sessions. When using Surface Hub 2S, teammates no longer have to worry about not feeling "present" enough or missing out on real-time collaboration. With Surface Hub 2S and its 4K+ resolution screen and barely visible two-element front-facing stereo speakers, your teammates can be seen and heard. And with an array of full-band 8-element microphones and 4K-capable camera,⁵ you look and sound crisp and clear.

Stay in the flow. With the hectic pace of work today, it's tough to stay focused and feel creative. Ideas are often born and die within the constraints of conference room walls. No more worrying about getting kicked out of the conference room and taking photos of the whiteboard — with Microsoft Whiteboard you can pick up where the team left off with a persistent, digital teamworking canvas you can share across devices and platforms. Surface Hub 2S lets you easily sign in to work with your Office 365 files,¹ access must-have Microsoft and business apps natively, project content wirelessly with Miracast, and interact naturally with Surface Hub 2 Pen and touch.⁵

Full Surface Hub 2S and accessories technical specifications below. Please see our partner websites for additional information on the [Steelcase Roam™ Mobile Stand](#) and [Wall Mount and APC™ Charge Mobile Battery](#).⁴

Surface Hub 2S Technical Specifications
