Construction advisory
Campus Modernization

Plan for upcoming construction
Starting March 8

We’re making progress on the Redmond campus modernization. Starting March 8, we’ll be installing new storm drains and sewer lines. This will take about four months (weather permitting).

What to expect
If you’re driving near buildings 3, 4, 5, 30-32, 36, and 37, travel times might be longer than usual due to road closures, detours and garage closures. There might also be construction noise by these buildings.

What you need to do
Plan for additional travel time. Be careful around the work zone and, if you have guests, tell them about the construction, so they know to plan for extra travel time, too.

Learn more
Visit aka.ms/ModernCampusAdvisories for details, and please check back regularly since plans may change due to weather or other factors.

Thank you for your patience and understanding. We’re doing everything we can to minimize disruptions.

Project update
Due to permitting issues with the City of Redmond, some construction dates have been postponed.

The dates on this poster have been updated and reflect the latest schedule.
