Redmond Traffic Advisory

Last updated July 14, 2020

We’re making exciting progress on the Redmond campus modernization. In alignment with this project, the City of Redmond will be temporarily closing the north east side of 40th St. beginning at the crosswalk, in order to begin work on the new pedestrian/bike friendly SR520 Trail underpass.

There will be a long term (17 day) closure for the trail work in **August from the 7th to the 24th**, and nine more weekend closures to complete the work. Final dates are being determined, but we expect at least the following dates in the near term:

- July 24-27
- August 3-6

We are doing everything we can to minimize disruption, but there will be impacts to building access for Buildings 120, 121 and The Commons. All of which will be accessible from 150th during the closures. Access to north and east campuses will be impacted as well, as people will not be able to come west on 520 and access the east side of 40th St. over the bridge. There will be detour routes for traffic and pedestrians; pedestrian routes will be marked with traffic cones, and traffic routes will be marked with signs. The two traffic detour routes will be:

- **Traffic:**
  - The first will be from NE 31st to NE 36th and across SR520 to 150th.
  - The second will be from 156th to NE 38th and around to 150th.

- **Pedestrian:**
  - The first will lead pedestrians around the work area behind the bus station to an on-campus walking path and connect to the 40th St. south side sidewalk.
  - The second will be accessible from the south side of NE 40th over the SR520 bridge.

A map of the traffic routes is outlined below in purple and green, and the pedestrian path is outlined by red arrows.

The project is estimated to be concluded in early 2021.
